

CULTURE WEEK 2022

CELEBRATING THE BEAUTY OF FREEDOM

The second week of August was filled with colourful festivities as HIS commemorated India's 75th Independence and celebrated India's rich cultural heritage. Each class from grades 1-10 adopted one state to research, represent, and pray for. Students learned the history, art, food and traditions of their adopted state; then they decorated their classrooms and displayed what they had learned. During culture week's assemblies, classes presented an overview of their state along with music, dance and skits. Later on, students had a chance to journey through India as they visited each decorated classroom.

INDEPENDENCE DAY
JOURNEY THROUGH INDIA

Independence Day Celebration

Independence Day Speech by Shayel Sony, grade 8

India is a great nation with some of the most exemplary accomplishments ever since we have received our independence. Our country has built a modern economy which is also the second fastest growing economy in the world. While doing this we have also remained as a democracy, giving each one of our people the right to vote for their leader. We have lifted millions of individuals from poverty.

Ever since the pandemic which began in 2020, each of us has been made to deal with our own struggles, with that being said, India has still produced great people that have made great accomplishments for our country. In 2021, we sent the second Indian born woman, Srisha Bandla, to space with 6 other passengers. We started 2022 with a blast as Neeraj Chopra won a gold medal in the olympics for javelin throwing. We have also had some great people having outstanding nominations such as Mr. Rickey Kej being nominated for a grammy as well as India bagging three nominations for the International Emmy Awards. India has also been nominated for an Oscar for Best Nominated Feature. We have even had one of our own people, Mrs. Kamala Harris, appointed as Vice President of the United states of America which is something not every country can brag about. Unlike most countries we have also defeated most cultural as well as gender barriers while appointing Honorable President, Draupadi Murmu as president of India who is both a tribal as well as a woman. India has also become the largest Digital Market in the world and is also the fastest-growing Startup Ecosystem. During the pandemic, India also ran the world's largest vaccine drive against Covid 19. In the last 76 years, India has made some great contributions to the medical field such as Ayurveda, Plastic Surgery as well as a cure of leprosy. These are just some of the great achievements our great country has made and is yet to make. With that being said, I will conclude with my speech. Happy Independence Day. Jai Hind!

INDEPENDENCE DAY CELEBRATION

Kerala - Grade 6

Tamil Nadu - Grade 7

Karnataka- Grade 8

Madhya Pradesh - Grade 9

Jharkhand - Grade 10
